ABOUT ME

Final-year Software Engineering student with strong expertise in frontend development and a growing interest in becoming a full-stack developer. Skilled in cross-team collaboration, bridging communication between frontend and backend requirements to ensure smooth development. Value humility, professionalism, and continuous learning, which enable me to adapt quickly in diverse working environments.

EDUCATION

MAE FAH LUANG UNIVERSITY – BACHELOR OF ENGINEERING IN SOFTWARE ENGINEERING 2022 – Present
GPAX: 3.19

DAMRONGRATSONGKROH SCHOOL – SCIENCE MATH ENGLISH PROGRAM 2019 – 2021
GPAX: 3.05

TECHNICAL SKILLS

Frontend & Mobile: HTML, JavaScript, TypeScript, React, Next.js, Vue.js, React Native, Flutter, Android Studio

Backend : Golang (Fiber), Node.js (Express)

Database: MongoDB, MySQL, PostgreSQL

Tools & Platforms: Git, Docker, Postman, VS Code

WORK EXPERIENCE

Yakkaw Mobile Application – Project Manager 2024 – 2025

- Developed a mobile app for monitoring air pollution (PM2.5) in Chiang Rai and northern Thailand.
- Integrated real-time PM2.5 data, interactive air-quality maps, and health-based recommendations.
- Built with React Native and PostgreSQL, with API testing handled through Postman.
- Led a cross-functional team, coordinated feature planning, code reviews, and testing.

Yakkaw Dashboard (Admin) – Project Manager, Frontend Developer 2024 – 2025

- Created an admin dashboard to manage content for the Yakkaw Mobile App and Website.
- Developed features such as notification management, sponsor integration, news publishing, and system administration.
- Built with Next.js, React, TypeScript, Material UI, Tailwind CSS; integrated with backend APIs using Golang (Echo) & PostgreSQL.
- Designed efficient admin workflows to improve content distribution and communication.

Management Employees (Personal Project) – Backend Developer 2025

- Developed a backend system in Go (Fiber + GORM) with JWT-based admin authentication and full CRUD functionality.
- Designed and implemented RESTful APIs with middleware for secure access control.
- Integrated with MySQL database via GORM and used .env for configuration management.
- Applied clean project structure with modular code for authentication, routing, and database connections.

Sport Complex Management – Frontend Developer (Booking) 2024

- Built a scalable sports facility booking system using Kafka + gRPC for real-time updates.
- Designed microservices architecture and core backend APIs in Golang.
- Delivered a responsive admin dashboard using NextUI & Tailwind CSS.

Deap Appointment Application – Frontend Developer 2023

- Architected a Firebase backend for real-time synchronization of appointments.
- Developed a mobile app with Flutter, focusing on clean UI/UX and smooth booking flow.
- Coordinated team workflow, performed code reviews, and optimized database queries.

Weather Forecast System – UX/UI Design & Documentation 2022

- Designed backend architecture with Spring Boot (Java) using the MVC pattern.
- Built APIs for scheduled data collection and structured storage in MySQL.
- Developed UI integration with JSP and deployed on Google Cloud Platform (GCP).

LANGUAGE

- **Native language:** Thai
- **Additional language:** English (Intermediate)
